

# Request Form

Local Authority: \_\_\_\_\_

Submitted By: \_\_\_\_\_

Business Name: \_\_\_\_\_

Business Address: \_\_\_\_\_

How many parking spaces are needed and where will these be accommodated elsewhere?

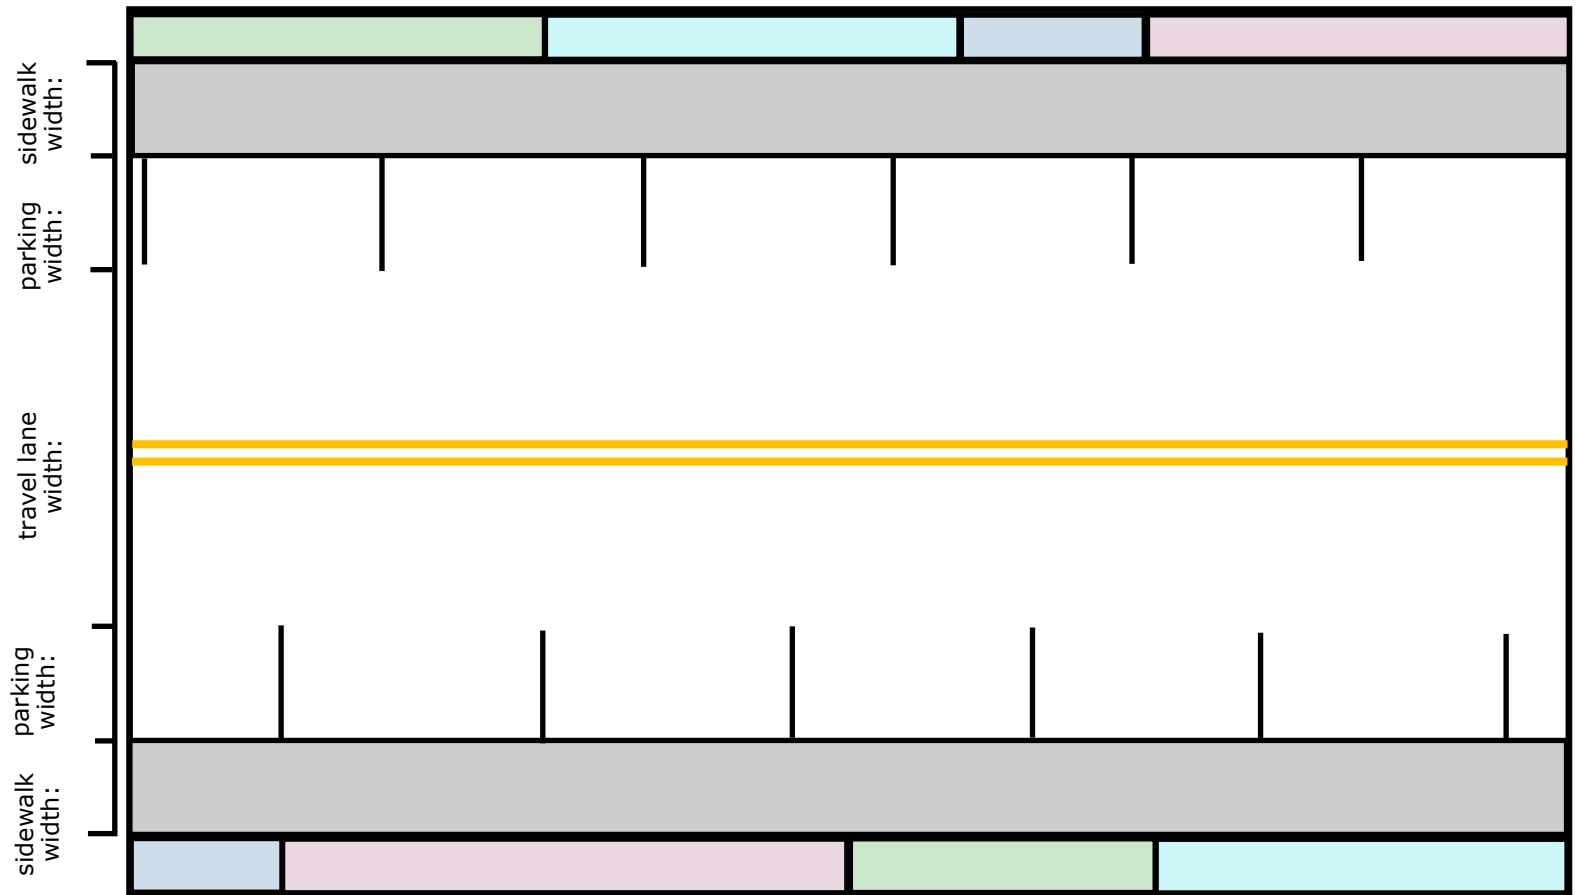

Where will pedestrians be expected to walk?

If pedestrians are redirected onto the road, how will they be protected?

In what ways has ADA accessibility been preserved?

Please outline the business's responsibilities and maintenance strategy.

Choose the storefront and parking space(s) that best represent your situation and note your desired parklet placement. Then mark up this diagram to show how customers, pedestrians, cyclists, and vehicle traffic will be accommodated for and delineated.

*diagram is not to scale and is intended only for concept depiction*

Please describe which features your parklet will have, including what barriers will be used to delineate between vehicle traffic and your parklet(s). Be mindful of how much distance is required between seating, as required by the most recent Executive Order.

For best practices on parklet design, please visit <http://www.nccouncil.org/parklets/>
